

# Eduroam Configuration for Windows

UNC Lineberger

IT Support

# Step 1:

- Connect to the *UNC-Setup* wireless network.

## Step 2:

- Once connected to the *UNC-Setup* network, the eduroam Wireless Configuration Portal should automatically launch in a browser window.
- If it does not, open a browser window and go to [wifi.unc.edu](https://wifi.unc.edu)

## Step 3:

- Select the *Click here to configure* button to continue with the configuration.

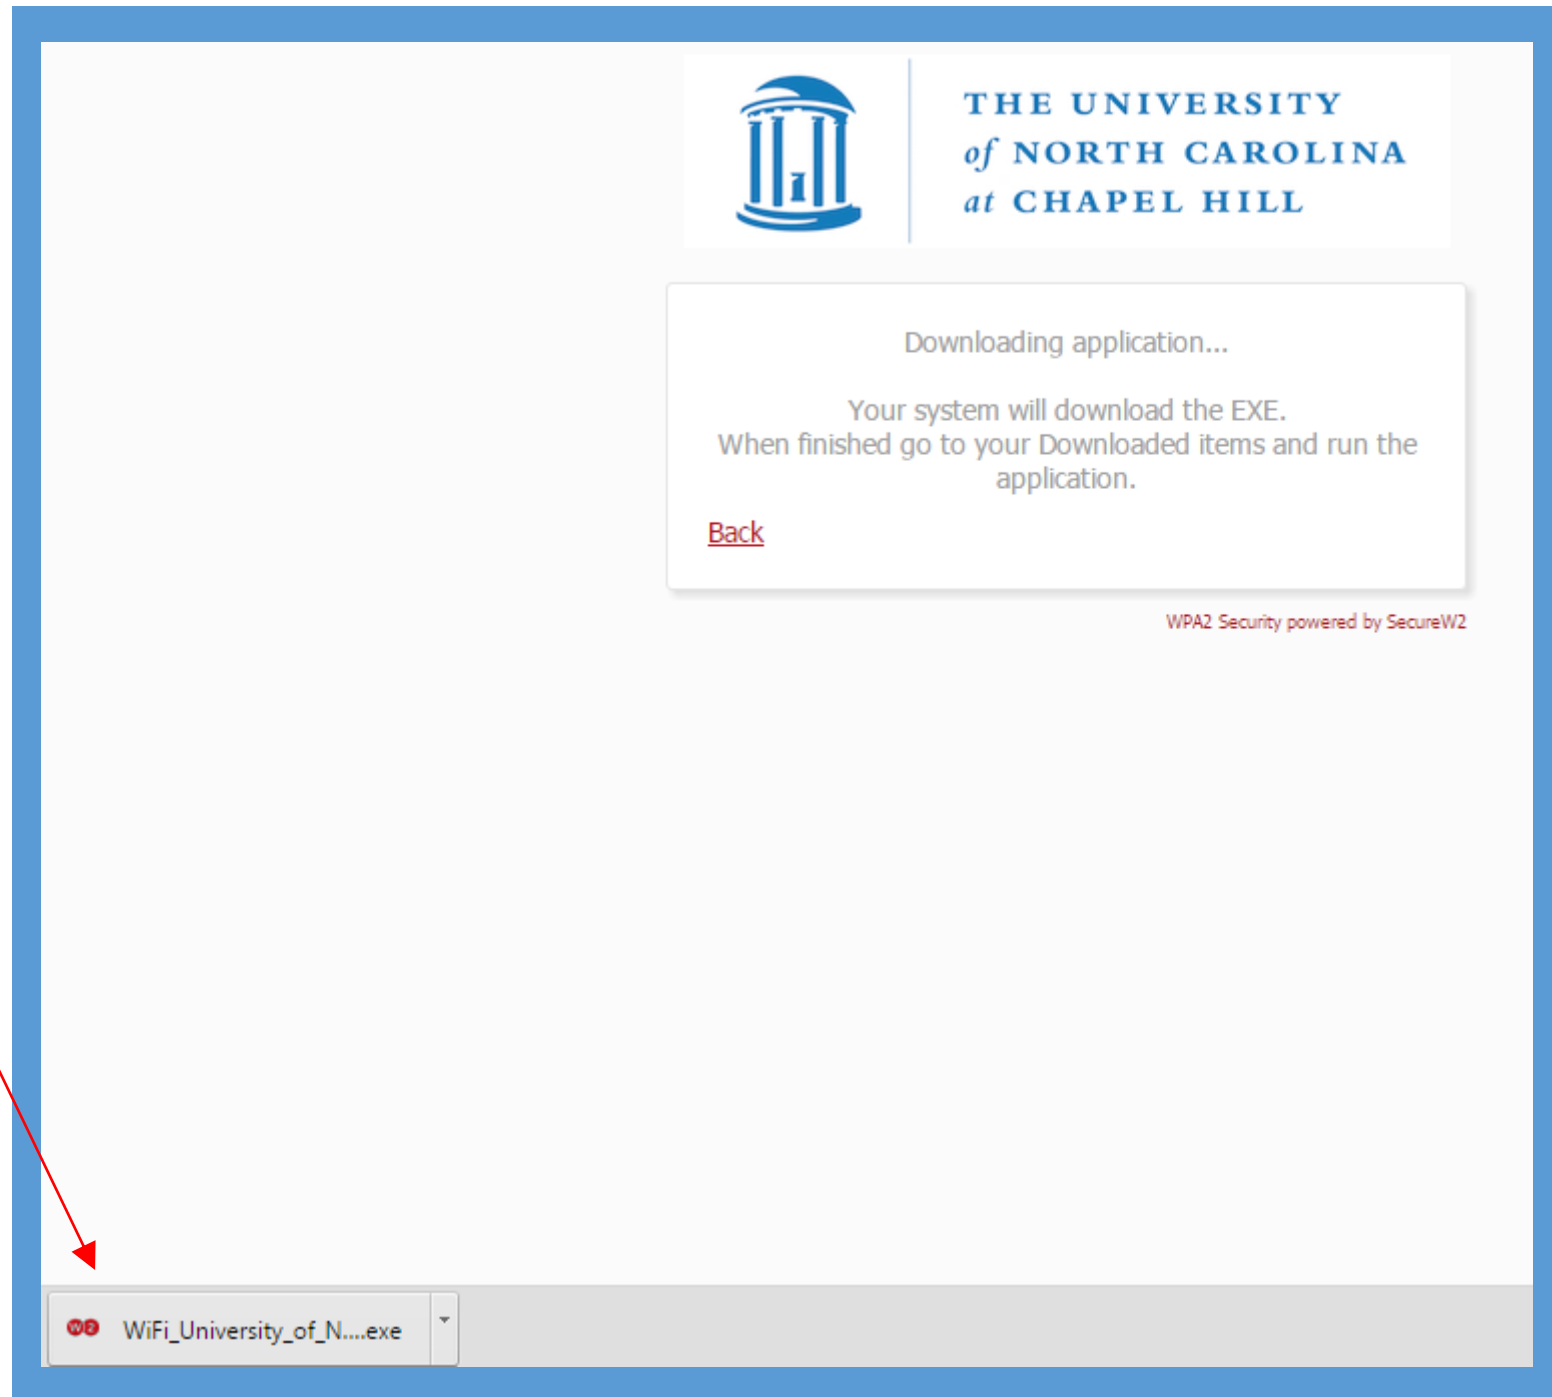

# Step 4:

- The UNC Wireless Network Configuration Utility will then detect your system information.
- Click *JoinNow* to begin configuration.

## Step 5:

- A configuration EXE file should begin downloading.
- After the EXE file is finished downloading, click on the file to run the EXE program.

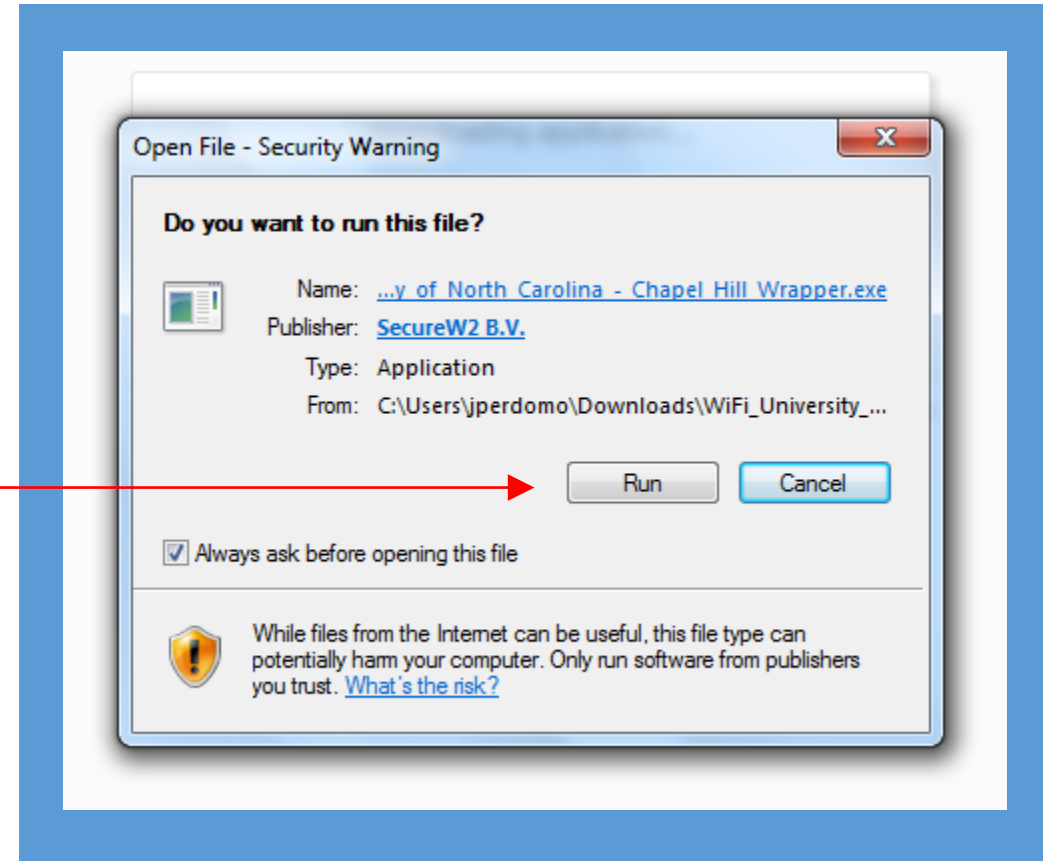

The screenshot shows a web page for The University of North Carolina at Chapel Hill. The page header includes the university's logo and name. A central message box states "Downloading application..." and provides instructions: "Your system will download the EXE. When finished go to your Downloaded items and run the application." A "Back" link is visible below the message. At the bottom right, there is a small text credit: "WPA2 Security powered by SecureW2".

At the bottom of the browser window, a taskbar notification is visible for a file named "WiFi\_University\_of\_N...exe". A red arrow points from the text in the list above to this notification.

# Step 6:

- You may be prompted with a Security Warning dialog box. Click *Run* to begin running the configuration file.

# Step 7:

- A configuration wizard will now attempt to authenticate and join your computer to the eduroam wireless network.
- Follow the instructions throughout this wizard, clicking *Next* to proceed.
- This wizard will complete the configuration of your device with the eduroam wireless network.
