Breast Imaging Technologies: Cancer Detection & Personalized Medicine

LECTURE DESCRIPTION

Breast cancer is the most common cancer among women in the world. There is no preventable cause for the disease. Consequently, our best means for detection and saving lives is with screening. This lecture will focus on essential advances in breast imaging and cancer detection.

Cherie M. Kuzmiak, DO, FACR, FSBI
Director of Breast Imaging
Associate Professor
of Radiology
Department of Radiology
UNC School Medicine
University of North Carolina at Chapel Hill

LEARNING OUTCOMES

- List three new developments in breast imaging
- Discuss the advantages and disadvantages of the advances in breast imaging and cancer detection
- Describe how the advances in breast imaging and cancer detection can be applied to the participant's practice patterns to benefit their patients

ACCREDITATION

The School of Nursing at the University of North Carolina at Chapel Hill is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

To successfully complete this program and be awarded 1 ANCC contact hour you must attend at least 50 minutes of the seminar and complete the online evaluation.

The American Registry of Radiologic Technologists (ARRT) is a leading credentialing organization that recognizes qualified individuals in medical imaging, interventional procedures, and radiation therapy.

Approved by the ASRT for 1 Category A continuing education credit.
