

Initiate requests on the “Request Services” Tab

The screenshot shows a navigation bar with the following tabs: About Our Core, Schedule Equipment, Request Services (circled), View All Requests, Reservations, People, Reporting, Billing, and Administration. Below the navigation bar, there is a list of services, each with an 'initiate request' button and an edit/delete icon:

- Clinical Trial Service Request**: To initiate a clinical trial service request please include all required information. Email PSC staff before dropping off/picking up materials.
- Copy/Upload Image from eSM (Digital Pathology)**: Consult to copy or upload images from eSlideManager.
- Digital Pathology Request**: Please initiate scanning requests here.
- GeoMX DSP Analysis Consultation**: Analysis of protein or RNA markers using Nanostring GeoMX Digital Spatial Profiling technology. PSC will contact you to discuss probes and pricing information. Go to <https://www.nanostring.com/scientific-content/technology-overview/digital-spatial-profiling-technology> for more information.
- Histology Request (Histology)**: Please initiate this request to submit samples to our facility for processing.
- Image Analysis Consultation (Digital Pathology)**: Image Analysis is charged by the hour. PSC can provide a free estimate based on the information below. Please attach a list of scan or image IDs for images to be analyzed.
- Staining Request**: Please initiate staining requests here.
- TMA Construction Request (Histology)**: Customers must consult with PSC before TMAs can be constructed. Please provide the info indicated below and we will contact you to set-up a meeting.

When you initiate a request, it is important that you select all relevant services, complete all required fields, and save after each step.

When you select a service, the appropriate form will open.

View Form: Histology

Please fill out the form below. Required fields indicated by a red star.

Service:

Please select your service below

- Grossing/Trimming
- Processing/Embedding
- Sections
- Scrolls
- Cores (Alone or for TMAs)
- Frozen Sectioning
- Cryostat Use for Frozen Sectioning

I have selected the “Processing & Embedding” service, generating the appropriate form. Complete all sections, add quantity you require, and click **“add selected services”**.

You will see a green check mark if items are added correctly.
