Caring for Adolescents and Young Adults Living with Cancer: Meeting their Unique Medical and Psychosocial Needs

Lauren Lux, LCSW

Program Director, Adolescent and Young Adult

Department of Pediatrics

UNC Lineberger Comprehensive Cancer Center

UNC School of Medicine

University of North Carolina at Chapel Hill

LECTURE DESCRIPTION

Adolescents and Young Adult living with cancer have unique medical and psychosocial needs. The recognition of these needs has created a new field of study in practice in the oncology world. As such many institutions are developing multidisciplinary teams to address AYA needs. However, you don't need a huge budget or a new program to make an impact with this age group. We will establish the age specific needs of this group and discuss some simple changes to make in your day to day practice that will help you meet your AYA patients' needs.

LEARNING OUTCOMES

- Identify the unique medical and psychosocial needs of AYA cancer patients.
- Discuss institutional barriers to delivering age specific care to AYAs with cancer.
- Implement simple changes in clinical practice to improve care delivery and coordination for AYAs with cancer.

ACCREDITATION

The School of Nursing at the University of North Carolina at Chapel Hill is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

To successfully complete this program and be awarded 1 ANCC contact hour you must attend at least 50 minutes of the seminar and complete the online evaluation.

The American Registry of Radiologic Technologists (ARRT) is a leading credentialing organization that recognizes qualified individuals in medical imaging, interventional procedures, and radiation therapy.

Approved by the ASRT for 1 Category A continuing education credit.
