Best of ASH 2018: Myeloma and Leukemia/MDS

LECTURE DESCRIPTION

Each year, the American Society of Hematology (ASH) hosts a conference highlighting some of the latest hematologic oncology research. Join us as our speakers discuss some of the top presentations on Myeloma and Leukemia/MDS from this year's ASH conference.

LEARNING OUTCOMES

- Compare the outcomes of previously untreated patients with chronic lymphocytic leukemia (CLL) who are treated with ibrutinib versus those treated with chemo-therapy
- Describe which patients with myelodysplastic syndromes may benefit from treatment with luspatercept
- Identify appropriate patients with myelodysplastic syndromes for iron chelation with deferasirox and list adverse outcomes that may be prevented by using this agent.

Brandi Reeves, MD

Professor of Medicine
Malignant Hematology
UNC Lineberger
Comprehensive Cancer Center
UNC School of Medicine
University of North Carolina
at Chapel Hill

Matthew Foster, MD

Associate Professor, Clinical Research
Leukemia, Lymphoma, and
Myeloma Program
