The Vital Role of Primary Care Providers in Breast Cancer

Allison Beam, MPAP, PA-C

Physician Assistant, Breast Oncology

Division of Oncology

UNC Lineberger Comprehensive Cancer Center

UNC School of Medicine

University of North Carolina at Chapel Hill

WEBINAR DESCRIPTION

This lecture will highlight the important role of primary care providers and provide helpful information that will empower them to confidently provide comprehensive and collaborative care to patients living with breast cancer and beyond.

LEARNING OUTCOMES

- Recognize some of the most common long-term effects of cancer treatment for breast cancer survivors and recommend therapeutic measures for each: Osteoporosis, Peripheral Neuropathy, Cardiotoxicity, “Chemo Brain”, Anxiety/Depression, Fatigue
- Describe how the SCP can be utilized in your practice as a tool to better provide comprehensive and collaborative care for breast cancer survivors
- Recognize that hormonal contraception/hormone replacement therapy are contraindicated in women with history of hormone receptor positive breast cancer

The program was co-provided with the Greensboro Area Health Education Center.
