Topics in Cancer Pharmacy in North Carolina: Updates for Oral Chemotherapy for 2022

Bianka Patel, PharmD, BCOP, CPP

Clinical Pharmacy Specialist

UNC Lineberger Comprehensive Cancer Center

UNC School of Medicine

University of North Carolina at Chapel Hill

WEBINAR DESCRIPTION

Oral chemotherapy is becoming increasingly common in treatment of various malignancies. Although oral oncolytics are extremely beneficial for patients, they also present unique challenges for patients and providers alike. Implementing oral chemotherapy often requires a multidisciplinary approach. This lecture will discuss several considerations for oral chemotherapy such as prescribing, patient education, adherence, medication access, cost and insurance authorization, monitoring, supportive care, and more. We will walk through a patient case to highlight practical suggestions for successful implementation of oral chemotherapy for patients.

LEARNING OUTCOMES

- Identify important considerations for prescribing oral chemotherapy
- Explain the steps involved in dispensing/distribution of oral chemotherapy to patients
- Describe best practices in monitoring, toxicity management, and follow-up for patients receiving oral chemotherapy

The program was co-provided with the Greensboro Area Health Education Center.
