Psycho-Social Complications of Receiving a Cancer Diagnosis and Treatment During the Pandemic

Justin Yopp, PhD

Associate Professor, Department of Psychiatry

Clinical Psychologist, Comprehensive Cancer Support Program

UNC Lineberger Comprehensive Cancer Center

UNC School of Medicine

University of North Carolina at Chapel Hill

WEBINAR DESCRIPTION

This presentation will focus on the unique psychosocial complications related to being diagnosed with - and treated for - cancer during the COVID pandemic.

LEARNING OUTCOMES

- Describe pandemic-related factors that contribute to the distress experienced by patients diagnosed with and treated for cancers
- Recognize how the psychosocial functioning of patients being treated for cancer is affected by the confluence of pandemic-related stressors and concerns of mortality
- Identify strategies that patients being treated for cancer during the pandemic can utilize to address psychosocial distress and promote adaptive coping

This program was co-provided with the UNC-Chapel Hill Digital Lifelong Learning
