Cardiovascular Toxicities of Cancer Therapies

Brian Colwell Jensen, MD

Associate Professor of Medicine and Pharmacology

Division of Cardiology

UNC Lineberger Comprehensive Cancer Center

UNC School of Medicine

University of North Carolina at Chapel Hill

WEBINAR DESCRIPTION

This webinar will introduce the audience to potential cardiovascular adverse effects of contemporary cancer therapeutics.

LEARNING OUTCOMES

- Recall that cancer therapies can have on-target and off-target effects on the cardiovascular system.
- Explain that trastuzumab is associated with cardiomyopathy.
- Recognize that kinase inhibitors that target the VEGF signaling pathway frequently cause hypertension.
- Discuss how myocarditis is a rare but potentially fatal complication of immune checkpoint inhibitors.
