Evaluation and Treatment of Extravasation Injuries from Chemotherapeutic Agents

Robyn Tolley, AGPCNP-BC

Adult Oncology Infusion Center APP

UNC Health – NC Basnight Cancer Hospital

UNC Lineberger Comprehensive Cancer Center

UNC School of Medicine

University of North Carolina at Chapel Hill

Webinar Description

Robyn Tolley, AGPCNP-BC, will identify cytotoxic vesicant and irritant drugs, evaluation of infiltration and extravasation, recommended non-pharmacologic and pharmacologic treatments, and when care should be advanced to involve plastic surgery. She will also include an evaluation of risk factors and appropriate preventive measures to reduce the risk of extravasation.

Learning Objectives

- Distinguish between cytotoxic vesicant and irritant drugs and the difference between infiltration and extravasation
- Recognize factors that increase the risk of extravasation and appropriate prevention strategies
- Discuss the pharmacology agents used in the treatment of extravasation
- Evaluate the staging of extravasation injuries and recognize when to escalate care

This program co-provided with **UNC Digital and Lifelong Learning**

Advanced Practice Provider webinars created and coordinated by **Tammy Triglianos, DNP, ANP-BC, AOCNP**, in partnership with **UNC Lineberger Cancer Network**.
