Antonio T. Baines, PhD

Associate Professor, Dept. of Biological & Biomedical Sciences

Joint Appointment, Cancer Research Program in the Julius L. Chambers Biomedical/ Biotechnology Research Institute

NC Central University

Adjunct Associate Professor, Dept. of Pharmacology

Member, Curriculum in Toxicology and Environmental Medicine

UNC School of Medicine

LECTURE DESCRIPTION

This lecture will be the first of many conversations from researchers and health professionals based at NCCU, UNC, and NC A&T about the family of diseases we call cancer. For this particular lecture, we will focus on some of the basic concepts and characteristics that define cancer and discuss why it is such a devastating problem for our society. Also, we will discuss why it seems to negatively plague minority communities the most.

LEARNING OUTCOMES

- Define what “cancer” is and list some of the causes.
- Describe what “health disparity” and “health equity” are.
- Discuss why more things need to be done to improve healthcare for all people.

Exploring Cancer is a collaboration between
