

Webinar Descriptions

Webinar Description

The webinar description serves as an “explainer” for the audience as a way to help them understand what the webinar is about.

Examples:

Malnutrition is a common complication in cancer patients at time of diagnosis and throughout treatment which can negatively affect outcomes. The presenter Moyers, MS, RD, CSO, LDN, discusses nutrition screening as a means to identify patients at risk of malnutrition and appropriately diagnose its extent.

or

Megan McElfresh, PA-C, will review chimeric antigen receptor therapy, associated side effects, and the treatment or prevention of side effects.

or

Katherine Garman, MD, and Meira Epplein, PhD, will provide information on gastric cancer and important risk factors such as H. pylori infection. They will describe some of the racial disparities associated with gastric cancer in the US, highlighting those that are relevant for North Carolina. They will also discuss H. pylori as a modifiable risk factor and they will review current guidelines on H. pylori testing, treatment, eradication testing, and the growing problem of antibiotic resistance.
