### Approach

- 1. Qualitative and quantitative study of adults in 3 large AI communities in NC to explore cancer-related health needs
- 2. Building on collaborations from the Native Pathways to Health and Healing Walk project
- 3. Partner with tribal leaders, community members and AI facilitators to lead talking circle
- 4. Analyze the qualitative data to identify key themes and summarize for dissemination with tribal communities and others.
- 5. Develop survey questions to capture cancer-related health needs from a larger number of AI community members
