## Physical Therapy Approaches to Oncology Care: Beyond Lymphedema

**Sarah Richardson, PT, DPT, CLT, WCS**

*Physical Therapist*

UNC Therapy Services

UNC Lineberger Comprehensive Cancer Center

UNC School of Medicine

University of North Carolina at Chapel Hill

### Webinar Description

Tailored for medical providers, this session led by a physical therapist addresses challenges like speech and swallowing difficulties or pelvic floor issues in gynecological cancer. Explore the pivotal role of physical therapy in survivorship care plans and delve into current research supporting interventions for head and neck, gynecological, breast cancer, and other oncological conditions. Emphasizing interdisciplinary collaboration, we'll discuss the synergy between medical providers and physical therapists in delivering optimal cancer care. Additionally, learn the art of patient education in oncology rehabilitation, empowering medical providers to effectively communicate the role of physical therapy in cancer care.

### Learning Objectives

- Identify physical challenges of cancer patients beyond lymphedema
- Discuss the role of physical therapy in survivorship care plans for cancer patients
- Explain the relationship of evidence-based physical therapy interventions and improved patient outcomes
- Describe the interdisciplinary collaboration of healthcare workers and physical therapists in delivering optimal cancer care

### Self-Paced, Online Course

Available in one month
