

Day in the Life of a Laboratory Physician

SCHOOL OF
MEDICINE

Undergraduate students from NC A&T and NCCU are invited to sign up for an intimate one-day experience within UNC's Department of Pathology & Laboratory Medicine.

What is the role of a pathologist?

Pathologists are integral to the diagnosis and management of disease.

Common responsibilities include:

- Analysis of cells, tissues, and organs
- Development and interpretation of laboratory tests

As a participant, you will learn about common diseases seen in autopsies, the diagnosis of blood cancer, and what happens to blood after it's donated.

When?

Saturday,
November 2nd
9 AM to 3 PM

RSVP by Friday, October 11th
Transportation, breakfast
and lunch provided.
