

Exploring Cancer

Discover Cancer Science and Career Pathways for Undergraduates

Exploring Cancer is an engaging course series led by expert cancer biologists, physicians, public health professionals, and other specialists from NCCU, NC A&T, and UNC-Chapel Hill.

Designed for undergraduate students, this program offers an introduction to cancer-related topics and career pathways to empower the next generation of leaders in cancer research, care, and advocacy.

Program Offerings

Live Webinars

Every fall semester, join us for interactive webinar presentations.

On-Demand Classes

Take courses made from past lectures for certificates of participation.

Video Recordings

Watch past recordings of presenting researchers, clinicians, and public health professionals.

Networking Events

Every Spring, join us for an in-person event including lab sessions, speakers, and exhibit booths.

UNCLCN Learning Portal

Exploring Cancer is hosted on UNC Lineberger's learning management system.
