**LINEBERGER
COMPREHENSIVE
CANCER CENTER**

Established in 1975, UNC Lineberger Comprehensive Cancer Center is in the top tier of nationally-recognized cancer centers. It is one of only 56 National Cancer Institute-designated comprehensive cancer centers and the only public comprehensive cancer center serving the state and people of North Carolina.

With research that spans the spectrum from the laboratory to the bedside to the community, UNC Lineberger's more than 400 members based at more than 40 departments across campus work to understand the causes of cancer at the genetic and environmental levels, to conduct groundbreaking laboratory research, and to translate findings into pioneering and innovative clinical trials.

Providers at the N.C. Cancer Hospital, the clinical home of UNC Lineberger, treat patients from across North Carolina and throughout the United States

250,000

outpatient visits

at the hospital and its affiliated clinics

9 cancer research programs

- cancer cell biology • immunology
- molecular therapeutics
- virology • cancer genetics
- clinical research • breast cancer
- cancer prevention and control
- cancer epidemiology

LARGEST

research entity at UNC-Chapel Hill

20%

of all newly diagnosed cancer patients in N.C. are treated at the N.C. Basnight Cancer Hospital and its affiliated clinics.

1 of 6

NCI Centers of Cancer Nanotechnology Excellence in the U.S.

\$732 million

overall extramural funding, including National Institutes of Health grants, since 2015

COMPASSIONATE AND EFFECTIVE

support through the UNC Comprehensive Cancer Support Program

Home to 3 NCI Specialized Programs of Research Excellence (SPORE):

3 Breast cancer, pancreatic cancer, head and neck cancer (shared)

263 clinical trials of the latest treatments developed at UNC or available through affiliation with national clinical trials groups

Home of Cancer Information and Population Health Resource

CIPHR

a system linking metrics of cancer incidence, mortality, and burden in North Carolina to describe health care, economic, medical claims, social, behavioral and environmental patterns

TCGA

Driving force of a The Cancer Genome Atlas, (TCGA) multi-institutional, NCI-funded effort to molecularly characterize several thousand human cancer samples

ages **13-39**

Provided for through the Adolescent and Young Adult Cancer Program

INNOVATIVE CAR-T IMMUNOTHERAPY

12 adult and pediatric clinical trials

5 FDA-approved CAR-T therapies
