The UNC Lineberger Comprehensive Cancer Center's Cancer Research Training & Education Coordination (CRTEC) is offering a virtual workshop on the planning and submission of NCI individual trainee applications, such as the F31, K01 and K08, for URM pre-doctoral, post-doctoral, and clinical fellows. The workshop will also cover the planning and submission of diversity supplements for existing grants awards such as R01, P01 and P50.

Dr. Belem López will give an overview of the award mechanisms offered by NCI as well as some tips on preparing a strong application. This presentation will be followed by a panel with UNC investigators/trainees who have received one of these awards, to answer questions.

Dr. Belem López is a Program Director in the Diversity Training Branch of NCI's CRCHD since December 2021. In this role, Dr. López is primarily responsible for managing the Youth Enjoy Science Research Education Program (R25).

Please register online in advance.
